Customary International Humanitarian Law - Jean-Marie Henckaerts 2005-03-03
Customary International Humanitarian Law, Volume I: Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important

treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts. Comment Don:RWI.

The Philosophy of Psychology -

George Botterill 1999-08-19

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. *The Philosophy of Psychology* is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the

debates on the topics discussed, it will also be of interest to researchers working in these areas.

Confessions of a Bangkok PI -
Warren Olson 2006-07-28

Two-timing bargirls, suspicious spouses and lesbian lovers - it was all in a day's work for Bangkok Private Eye Warren Olson. For more than a decade, Olson walked the mean streets of the Big Mango. Fluent in Thai and Khmer, he was able to go where other private eyes feared to tread. His clients included Westerners who had lost their hearts and life savings to moneyhungry bargirls. But he had more than his fair share of Thai clients, too, including a sweet old lady who was ripped off by a Christian conman and a Thai girl blackmailed by a former lover. The stories are based on Olson's case files, disguised to protect the innocent and the guilty by bestselling author Stephen Leather. Olson has now relocated to his native New Zealand with his Thai wife and daughter, but the agency that he founded is still open for business at www.thaiprivateeye.com.

Rules for Radicals - Saul Alinsky
2010-06-30

First published in 1971, *Rules for Radicals* is Saul Alinsky's impassioned counsel to young radicals on how to effect constructive social change and know "the difference between being a realistic radical and being a rhetorical one."

Written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse and

adherence to the American democratic tradition.

Super Thinking - Gabriel Weinberg 2019-06-18

A WALL STREET JOURNAL BESTSELLER! "You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't

have them in a usable form. You've got to have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read *Super Thinking*, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Well, here are just a few examples... • If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the

Eisenhower Decision Matrix to help you prioritize. • Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem. • Before concluding that your colleague who messes up your projects is out to sabotage you, consider Hanlon's Razor for an alternative explanation. • Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy. • Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let *Super Thinking* upgrade your brain with mental models.
