Traffic and Transport Psychology - Geoffrey Underwood 2005-06-09
Just as our transport systems become more and more important to our economic and social well-being, so they become more and more crowded and more at risk from congestion, disruption, and collapse. Technology and engineering can provide part of the solution, but the complete solution will need to take account of the behaviour of the users of the transport networks. The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations, to understand how novice and other vulnerable users can develop safe and effective behaviours, how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations. The contributions to this volume address these issues of how the use of our transport systems can be improved by taking into account knowledge of the behaviour of the people who use the systems. Topics discussed include driver training and licensing, driver impairment, road user attitudes and behaviour, enforcement and behaviour change, driver support systems, and the psychology of mobility and transport mode choice. This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic.

Reflections on the History of Computers in Education - Arthur Tatnall 2014-05-05

This book is a collection of refereed invited papers on the history of computing in education from the 1970s to the mid-1990s presenting a social history of the introduction and early use of computers in schools. The 30 papers deal with the introduction of computer in schools in many countries around the world: Norway, South Africa, UK, Canada, Australia, USA, Finland, Chile, The Netherlands, New Zealand, Spain, Ireland, Israel and Poland. The authors are not professional historians but rather people who as teachers, students or researchers were involved in this history and they narrate their experiences from a personal perspective offering fascinating stories.

Handbook of Teen and Novice Drivers - Donald L Fisher 2016-09-19
Despite a growing body of research and targeted remediation, teenage and novice drivers continue to be six to nine times more likely to die in a crash than they are when they are just a few years older. The World Health Organization reports that road traffic injuries are the leading cause of death globally among 15 to 19 year olds. In light of these crash statistics, understanding the teen driver problem remains of paramount public health importance around the world. The Handbook of Teen and Novice Drivers: Research, Practice, Policy, and Directions provides critical knowledge for a broad range of potential readers, including students, teachers, researchers in academics, industry and the federal government, public policy makers at all levels, insurance companies and automobile manufacturers, driving instructors, and parents and their teens.

Behavioural Adaptation and Road Safety - Christina Rudin-Brown 2013-05-24

Despite being an accepted construct in traffic and transport psychology, the precise nature of behavioural adaptation, including its causes and consequences, has not yet been established within the road safety community. A comprehensive collection of recent literature, Behavioural Adaptation and Road Safety: Theory, Evidence, and Action explores behavioural adaptation in road users. It examines behavioural adaptation within the context of historical and theoretical perspectives, and puts forth tangible—and practical—solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs. Edited by Christina Rudin-Brown and Samantha Jamson, with chapters authored by leading road safety experts in driver psychology and behaviour, the book introduces the concept of behavioural adaptation and details its more relevant issues. It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces, identifying where it may be lacking and how it might be improved. This sets the context for the remaining chapters which take the OECD definition as their starting

points. The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century. It provides examples of the "evidence" for behavioural adaptation—instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures. The book then focuses on the internal, "human" element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups. The book concludes with practical tools and methodologies to address behavioural adaptation in research and design, and to limit the potential negative effects before they happen. Supplying easy-to-understand, accessible solutions that can be implemented early on in a road safety intervention's design or conception phase, the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report. The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice, methods, and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs. It is an essential component of any road safety library, and should be of particular relevance to researchers, practitioners, designers, and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport-related design.

Young Drivers - OECD/ECMT Transport Research Centre 2006-10-04

The great over-representation of young drivers in crashes and road fatalities is a serious public health problem that exacts an unacceptable toll in human, social and economic terms. Young drivers account for about 27 per cent of driver fatalities across OECD countries, although people in the same age group represent only about 10 per cent of the population. Furthermore, between 20 and 30 per cent of total traffic fatalities result from crashes involving a young driver. Young male drivers' crash fatality rates are as much as three times those of young female drivers, and remain much higher even when adjusted to factor in their higher rates of exposure. In some countries, young males' relative risk, compared to that of other drivers, is increasing. The high levels of young driver risk result principally from factors of inexperience, age, and gender. This risk is aggravated by the circumstances under which many young people drive - young people, especially men, are over-represented in crashes at high speed, at night, with similarly aged passengers, involving alcohol, and often when not wearing seatbelts. There is no single solution. The goal of reduced young driver crashes must be pursued through a combination of countermeasures involving the licensing process, training and learning methods, enforcement, education and communication, and technology.

Elementary Number Theory with Applications - Thomas Koshy 2002
The advent of modern technology has brought a new dimension to the power of number theory: constant practical use. Once considered the purest of pure mathematics, it is used increasingly now in the rapid

development of technology in a number of areas, such as art, coding theory, cryptology, computer science, and other necessities of modern life. Elementary Number Theory with Applications is the fruit of years of dreams and the author's fascination with the subject, encapsulating the beauty, elegance, historical development, and opportunities provided for experimentation and application. This is the only number theory book to show how modular systems can be employed to create beautiful designs, thus linking number theory with both geometry and art. It is also the only number theory book to deal with bar codes, Zip codes, International Standard Book Numbers (ISBN), and European Article Numbers (EAN). Emphasis is on problem-solving strategies (doing experiments, collecting and organizing data, recognizing patterns, and making conjectures). Each section provides a wealth of carefully prepared, well-graded examples and exercises to enhance the readers' understanding and problem-solving skills. Handbook of Traffic Psychology - Bryan E. Porter 2011-06-22

The Handbook of Traffic Psychology covers all key areas of research in this field including theory, applications, methodology and analyses, variables that affect traffic, driver problem behaviors, and countermeasures to reduce risk on roadways. Comprehensive in scope, the methodology section includes case-control studies, self-report instruments and methods, field methods and naturalistic observational techniques, instrumented vehicles and in-car recording techniques, modeling and simulation methods, in vivo methods, clinical assessment, and crash datasets and analyses. Experienced researchers will better understand what methods are most useful for what kinds of studies and students can better understand the myriad of techniques used in this discipline. Focuses specifically on traffic, as opposed to transport Covers all key areas of research in traffic psychology including theory, applications, methodology and analyses, variables that affect traffic, driver problem behaviors, and countermeasures to reduce the risk of variables and behavior Contents include how to conduct traffic research and how to analyze data Contributors come from more than 10 countries, including US, UK, Japan, Netherlands, Ireland, Switzerland, Mexico, Australia, Canada, Turkey, France, Finland, Norway, Israel, and South Africa

Young Drivers The Road to Safety - European Conference of Ministers of Transport 2006-09-04

With traffic crashes being the single greatest killer of those aged 15-24 in OECD countries, this report provides an overview of the scope of the problem of young driver risk, its primary causes and concrete options to combat it.

The Official DVSA Theory Test for Car Drivers - Driver And Vehicle Standards Agency (Dvsa) 2015-10-26

This publication is the official theory test book for car drivers, compiled by the Driver and Vehicle Standards Agency. It contains multiple choice questions from the whole theory test question bank, with answers and explanations, dealing with topics such as: alertness and attitude, vehicle safety and handling, safety margins, hazard awareness, vulnerable road users, motorway rules and rules of the road, road and traffic signs, documents, accidents, and vehicle loading.

The Handbook of Road Safety Measures - Rune Elvik 2009-10-14

Contains summaries of the knowledge regarding the effects of 128 road safety measures. This title covers various areas of road safety including: traffic control; vehicle inspection; driver training; publicity campaigns; police enforcement; and, general policy instruments. It also covers topics such as post-accident care, and speed cameras.

Norway: The Champion of World Peace - Vikram Singh 2008

(i) The travelogue on Norway by Dr Vikram Singh gives a peep on Norwegian land, people and culture, that has made easy to understand Norge life, literature, art, architecture, history, geography, its Fjords, sledges and message 'Food and education to all but war to none'. Its message of world peace has also got expression on Noble prize for peace, the only Nobel prize given from

Norway. (iii) The emphasis on the role of journeys in the development of knowledge, science and technology, has added the importance of the travelogue. (iv) The presentation of the essential information's about Norway and a comparative study vis-a-vis India has made easy to comprehend Norway. The graphic description substantiated with the photos has made it more entertaining and interesting to the literateurs, readers, tourists and students. (v) The popularity and importance of the travelogue has been recognized by Uttar Pradesh Hindi Sansthan, Lucknow to select Suraj Chandani Raat Mein the Hindi travelogue on Norway by Dr. Vikram Singh for its prestigious Award 'Agvey Award' for 2003.

The Norwegian Prison System - Are Hoidal 2022-12-30

This book presents a comprehensive overview of the Norwegian Correctional Service and the values and principles underlying its operations, using the renowned Halden Prison as a case study. Since its opening in 2010, Halden has been recognized for its uniquely humane treatment of inmates and emphasis on rehabilitation. This book chronicles the lessons learned from the operation of Halden Prison and scrutinizes the effectiveness of its policies. Staff at Halden operate under a notion of "dynamic security," in which guards circulate around the prison interacting and developing relationships with inmates rather than surveying from a fixed location. Recounted from the perspectives of various actors in the system, and incorporating commentary from international correctional experts, this book sheds light on the effects of the approaches and paradigm shifts that have made Halden different from other prisons. The book presents a balanced picture of how such an approach works, with practical examples of successes and failures. This book contextualizes how and why this example of reform achieved successful outcomes when others failed, and how it can be improved upon in the future. Illuminating new directions for prison reform, it is essential reading for academics and students engaged in the study of criminology, corrections, and penology, as well as practitioners, administrators, judges, policymakers, and advocates.
