The Magic of M.C. Escher - Maurits Cornelis Escher 2006

As beautiful and rigorous as an Escher work itself, this book is the classic study of a great maverick who so memorably linked the world of imagemaking with geometry and paradox.

Escher's works, from the great master prints to numerous drawings, are brilliantly arranged to form a cinematic journey of discovery that reveals the magical world of the artist's mind, an uncharted realm lush with exotic conceptions and inventions.

Henri Matisse - John Jacobus 1984

One of the great pioneering masters of twentieth century art, Henri Matisse was an extremely versatile and productive artist. Although he was an outstanding sculptor and draftsman, he was most widely known and loved for his paintings. And his paintings-vibrant, colourful, and diverse-

are the focus of this book. John Jacobus, the Leon E. Williams Professor of Art at Dartmouth College, New Hampshire, tells the fascinating story of Matisse's life, exploring the relation of his work to the art of the past and showing how it contributed to the art of today. In this volume's forty stunning colour plates the artist's most important paintings are reproduced, and each is accompanied by a detailed commentary on the page facing the illustration. With 105 illustrations, 40 in colour.

Impossible Worlds - Bruno Ernst 2006

Camp So-and-So - Mary McCoy 2017-03-01

The letters went out in mid-February. Each letter invited its recipient to spend a week at Camp So-and-So, a lakeside retreat for girls nestled high in the Starveling Mountains. Each letter came with a glossy brochure with photographs of young women climbing rocks, performing Shakespeare under the stars, and spiking volleyballs. By the end of the month,

twenty-five applications had been completed, signed, and mailed. Had any of these girls tried to visit the camp for themselves on that day in February, they would have discovered that there was no such mountain, and that no one within a fifty-mile radius had ever heard of Camp So-and-So . . .

Explorations - Debbie Keiser Triska 2021-09-10
Explorations, a book in the Multiage Differentiated Curriculum Kit for Grades 4-6, gives students the opportunity to explore our world. The books in Prufrock's new Differentiated Curriculum Kits employ a differentiated, integrated curriculum based on broad themes. This all-in-one curriculum helps teachers save planning time, ensure compliance with national standards, and most importantly, pique their students' natural excitement and interest in discovery. By participating in the wide variety of activities in the Multiage Differentiated Curriculum Kit for Grades 4-6, students will explore the world around them and gain a lifelong desire to learn. From the mysterious depths of the ocean, to the craters of Mars, students will be challenged to go a step beyond the explorers who came before them. In one activity, students will act as explorers and examine the culture they live in. Students then

will take characteristics from their discoveries and try to adapt them to another civilization. Social inequality and the effects of nutritional habits on the heart will be examined. Students also will explore winter survival tactics and retrace the steps of some famous explorers, such as Marco Polo. Explorations, along with the other books in the Multiage Differentiated Curriculum Kit for Grades 4-6 (Balances, Choices, Questions, and Viewpoints), makes teaching advanced learners easier! Grades 4-6 This curriculum unit makes use of the following great children's literature books: Marco Polo: A Journey Through China by Fiona MacDonald; Brian's Winter by Gary Paulsen; How Do You Lift a Lion? by Robert E. Walls (optional) and; The Magic of M.C. Escher by M.C. Escher et al. (optional).

The World of M. C. Escher - Maurits Cornelis

Escher 1974

M.C. Escher (1898-1972) is renowned for his ability to render the visions of his mind's eye. The visions themselves were remarkable: for Escher, the skin of the visible world was nothing more than a piece of cloth that could be cut, folded, shaped, and rearranged in marvelous ways. A superb draftsman, he portrayed these other-worldly transformations of space within the familiar borders of a sheet of paper. The resulting images have become the favorite artworks of viewers around the world. The Magic of M.C. Escher does justice to this original artist's inventions. Escher's works--woodcuts, lithographs, and drawings, accompanied by quotes from the author--are brilliantly arranged to form a cinematic look at his achievements. Here is the magical world of the artist's mind, an uncharted realm full of exotic conceptions and inventions.

Cycles of Time - Roger Penrose 2011-09-06
From Nobel prize-winner Roger Penrose, this

groundbreaking book is for anyone "who is interested in the world, how it works, and how it got here" (New York Journal of Books). Penrose presents a new perspective on three of cosmology's essential questions: What came before the Big Bang? What is the source of order in our universe? And what cosmic future awaits us? He shows how the expected fate of our ever-accelerating and expanding universe—heat death or ultimate entropy—can actually be reinterpreted as the conditions that will begin a new “Big Bang.” He details the basic principles beneath our universe, explaining various standard and non-standard cosmological models, the fundamental role of the cosmic microwave background, the paramount significance of black holes, and other basic building blocks of contemporary physics. Intellectually thrilling and widely accessible, *Cycles of Time* is a welcome new contribution to our understanding of the universe from one of our greatest mathematicians and thinkers.

Slade House - David Mitchell 2015-10-27

The New York Times bestseller by the author of *The Bone Clocks* and *Cloud Atlas* | Named One of the Best Books of the Year by San Francisco Chronicle, NPR, Los Angeles Times, The Guardian, The Telegraph, National Post, BookPage, and Kirkus Reviews Keep your eyes peeled for a small black iron door. Down the road from a working-class British pub, along the

brick wall of a narrow alley, if the conditions are exactly right, you'll find the entrance to Slade House. A stranger will greet you by name and invite you inside. At first, you won't want to leave. Later, you'll find that you can't. Every nine years, the house's residents—an odd brother and sister—extend a unique invitation to someone who's different or lonely: a precocious teenager, a recently divorced policeman, a shy college student. But what really goes on inside Slade House? For those who find out, it's already too late. . . . Spanning five decades, from the last days of the 1970s to the present, leaping genres, and barreling toward an astonishing conclusion, this intricately woven novel will pull you into a reality-warping new vision of the haunted house story—as only David Mitchell could imagine it. Praise for *Slade House* “A fiendish delight . . . Mitchell is something of a magician.”—The Washington Post “Entertainingly eerie . . . We turn to [Mitchell] for brain-tickling puzzle palaces, for character studies and for

language.”—Chicago Tribune “A ripping yarn . . . Like Shirley Jackson’s Hill House or the Overlook Hotel from Stephen King’s The Shining, [Slade House] is a thin sliver of hell designed to entrap the unwary. . . . As the Mitchellverse grows ever more expansive and connected, this short but powerful novel hints at still more marvels to come.”—San Francisco Chronicle “Like Stephen King in a fever . . . manically ingenious.”—The Guardian (U.K.) “A haunted house story that savors of Dickens, Stephen King, J. K. Rowling and H. P. Lovecraft, but possesses more psychic voltage than any of them.”—Pittsburgh Post-Gazette “Tightly crafted and suspenseful yet warmly human . . . the ultimate spooky nursery tale for adults.”—The Huffington Post

Make Believe - Kate Ryan 2019-03-18

Make Believe: M.C. Escher for Kids (National Gallery of Victoria) is shortlisted in the CBCA Eve Pownall category for information books. It was written to complement the Escher artworks

shown at the Gallery but has an ongoing life of its own after the exhibition. The book is well designed with a contents page and photographic representations of the illustrated work at the end. There is quite minimal, well-chosen written text in this sumptuous production. The illustrations do most of the work of communicating the life and art of 20th century Dutchman M.C. Escher. Escher, or Maurits, as he is known in the book, lived in Italy for many years and was inspired by the landscape - built and natural - there. Make Believe is structured as a mixture of biography and art, with interactive activities for children and tangents into geometry and science based on Escher's work. Above all, it is a wonderful exploration and celebration of his art for primary-aged children. *Jnl M.C.Escher/Metamorphosis* - M. C. Escher 2010-08
