Integration of Medical and Dental Care and Patient

Data - Valerie Powell

2012-01-18

This book informs readers of the needs and rationale for the integration of medical and dental care and information with an international perspective as to how and where medical and dental care separated into specific domains. It provide high level guidance on issues involved with care and data integration and how to achieve an integrated model of health care supported by integrated HIT. A patient typically expects that a visit to a dentist can usually be resolved immediately. This expectation places a premium on instant, accurate, thorough, and current information. The state-of-the-art of fully

integrated (dental-medical) electronic health record (EHR) is covered and this is contrasted with the current state of dental-medical software. While dentists in the US Veterans Health Administration (VHA), the US Indian Health Service (IHS), or the US military, for example, have access to fully integrated health records, most US clinicians still gather information from separate sources via fax or phone calls. The authors provide an in-depth discussion of the role of informatics and information science in the articulation of medical and dental practices and clinical data with the focus on applied clinical informatics to improve quality of care, practice efficiency, coordination and continuity of care, communication between physicians and dentists and to provide a more comprehensive care for the patients. Lastly, the book examines advances in medical and dental research and how these may affect dentistry in the future. Most new advances in healthcare

research are information-intensive.

Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities - Taher, Mohamed 2021-11-12

In achieving civic engagement and social justice in smart cities, literacy programs are offered in the society by three essential information service providers: libraries, archives, and museums. Although the library and museum services are documented in literature, there is little evidence of community-led library or museum services that make a full circle in understanding community-library, community-archive, and community-museum relationships. The Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities examines the application of tools and

techniques in library and museum literacy in achieving civic engagement and social justice. It also introduces a new outlook in the services of libraries and museums. Covering topics such as countering fake news, human rights literacies, and outreach activities, this book is essential for community-based organizations, librarians, museum administrations, education leaders, information

professionals, smart city design planners, digital tool developers, policymakers engaged in diversity, researchers, and academicians. [The Admission and Placement of Students from Bangladesh, India, Pakistan, Sri Lanka](#) - Leo J. Sweeney 1986
