The Book of Lieder - Ian Bostridge 2011-03-03

This unique volume contains, in parallel translation, a thousand of the most frequently performed Lieder, both piano-accompanied and orchestral. Composers are arranged alphabetically, with their songs appearing under poet in chronological order of composition - thus allowing the reader to engage in depth with a particular poet and at the same time to follow the composer's development. Richard Stokes, whose work in this field is already widely acclaimed, provides illuminating short essays on each of the fifty composers' approach to Lieder composition, as well as well as notes on all the poets who inspired the songs. The volume is notable for the accuracy and elegance of its translations, and for its fidelity to the German verse: every care has been taken to print the words of the sung text, while adhering to the versification and punctuation of the original poem. Beethoven, Schubert and Schumann, Goethe, Heine and Schiller are among the highlights of a book which illuminates one of the great musical traditions and will be an indispensable handbook for every music lover.

Global Health Impact - Nicole Hassoun 2020-07-17

Every year nine million people are diagnosed with tuberculosis, every day over 13,400 people are infected with AIDs, and every thirty seconds malaria kills a child. For most of the world, critical medications that treat these deadly diseases are scarce, costly, and growing obsolete, as access to first-line drugs remains out of reach and resistance rates rise. Rather than focusing research and development on creating affordable medicines for these deadly global diseases, pharmaceutical companies instead invest in commercially lucrative products for more affluent customers. Nicole Hassoun argues that everyone has a human right to health and to access to essential medicines, and she proposes the Global Health Impact (global-health-impact.org/new) system as a means to guarantee those rights. Her proposal directly addresses the pharmaceutical industry's role: it rates pharmaceutical companies based on their medicines' impact on improving global health, rewarding highly-rated medicines with a Global Health Impact label. Global Health Impact has three parts. The first makes the case for a human right to health and specifically access to essential medicines. Hassoun defends the argument against recent criticism of these proposed rights. The second section develops the Global Health Impact proposal in detail. The final section explores the proposal's potential applications and effects, considering the empirical evidence that supports it and comparing it to similar ethical labels. Through a thoughtful and interdisciplinary approach to creating new labeling, investment, and licensing strategies, Global Health Impact demands an unwavering commitment to global justice and corporate responsibility.

The third edition of Vis-à-vis continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the "Correspondance" feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson "Correspondance" cultural spread) and in the new "Bienvenue dans le monde francophone" feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world.
