

The Open University Of Sri Lanka

Getting the books **The Open University Of Sri Lanka** now is not type of challenging means. You could not unaccompanied going taking into account books heap or library or borrowing from your associates to entry them. This is an certainly simple means to specifically acquire guide by on-line. This online proclamation The Open University Of Sri Lanka can be one of the options to accompany you bearing in mind having new time.

It will not waste your time. resign yourself to me, the e-book will unconditionally expose you extra thing to read. Just invest tiny times to entre this on-line pronouncement **The Open University Of Sri Lanka** as well as review them wherever you are now.

The Report: Sri Lanka - Oxford Business Group 2016-05-12

While the presidential and parliamentary elections in 2015 instigated a wait-and-see approach within Sri Lanka's private sector, the outcome is expected to be positive in the longer term, bringing improved stability and a more encouraging environment for foreign investment. Under what has been described as a more liberal, open and business-oriented government, Sri Lanka is entering a period in which it stands to grow rapidly. In 2016 the country should begin to see the benefits of the recent reform agenda, as the new leadership introduces policies that will help bring about strong and sustainable growth.

Virtual Inequality - Karen Mossberger 2003-08-18

That there is a "digital divide"—which falls between those who have and can afford the latest in technological tools and those who have neither in our society—is indisputable. *Virtual Inequality* redefines the issue as it explores the cascades of that divide, which involve access, skill, political participation, as well as the obvious economics. Computer and Internet access are insufficient without the skill to use the technology, and economic opportunity and political participation provide primary justification for realizing that this inequality is a public problem and not simply a matter of private misfortune. Defying those who say the divide is growing smaller, this volume, based on a unique national survey that includes data from over 1800 respondents in low-income communities, shows otherwise. In addition to

demonstrating why disparities persist in such areas as technological abilities, the survey also shows that the digitally disadvantaged often share many of the same beliefs as their more privileged counterparts. African-Americans, for instance, are even more positive in their attitudes toward technology than whites are in many respects, contrary to conventional wisdom. The rigorous research on which the conclusions are based is presented accessibly and in an easy-to-follow manner. Not content with analysis alone, nor the untangling of the complexities of policymaking, *Virtual Inequality* views the digital divide compassionately in its human dimensions and recommends a set of practical and common-sense policy strategies. Inequality, even in a virtual form this book reminds us, is unacceptable and a situation that society is compelled to address.

Thinking Critically - Open University 2008-07-14

To think critically, is to weigh up all sides of an argument and evaluate its strengths and weaknesses. This is a skill that we use in many everyday decision making situations. This booklet shows how these skills can be transferred effectively to academic life. It explains why critical thinking is important, and contains advice on reading with a critical eye, writing with a critical voice and techniques to practice with others. There is an accompanying Skills for OU Study website <http://www.open.ac.uk.skillsforstudy>. If you are a current OU student please contact Student Services before ordering.

The Lexis and Lexicogrammar of Sri Lankan

English - Tobias Bernaisch 2015-09-15

This book offers the first in-depth corpus-based description of written Sri Lankan English. In comparison to British and Indian English, lexical and lexicogrammatical features of Sri Lankan English are analysed in a complex corpus environment comprising data from the respective components of the International Corpus of English, newspapers and online sources to explore the status of Sri Lankan English as a variety in its own right. The evolution of Sri Lankan English is depicted against the background of historical as well as sociolinguistic considerations and allows deriving a fine-grained model of the emergence of distinctive structural profiles of postcolonial Englishes developing in a multitude of norm orientations. This book is highly relevant to readers interested in Sri Lankan English and South Asian Englishes. It also offers more general sociolinguistic perspectives on the dynamics of postcolonial Englishes world-wide and on the inextricable link between language and identity.

Pharmacy Practice in Developing Countries -

Ahmed Fathelrahman 2016-02-13

Pharmacy Practice in Developing Countries: Achievements and Challenges offers a detailed review of the history and development of pharmacy practice in developing countries across Africa, Asia, and South America. Pharmacy practice varies substantially from country to country due to variations in needs and expectations, culture, challenges, policy, regulations, available resources, and other factors. This book focuses on each country's strengths and achievements, as well as areas of weakness, barriers to improvement and challenges. It sets out to establish a baseline for best practices, taking all of these factors into account and offering solutions and opportunities for the future. This book is a valuable resource for academics, researchers, practicing pharmacists, policy makers, and students involved in pharmacy practice worldwide as it provides lessons learned on a global scale and seeks to advance the pharmacy profession. Uses the latest research and statistics to document the history and development of pharmacy practice in developing countries Describes current practice across various pharmacy

sectors to supply a valuable comparative analysis across countries in Africa, Asia, Europe, and South America Highlights areas of achievement, strengths, uniqueness, and future opportunities to provide a basis for learning and improvement Establishes a baseline for best practices and solutions

Library Services for Open and Distance Learning - Alexander L. Slade 2000

Identifying and describing more Than 750 works published since its precursor was completed in 1995, This book provides a comprehensive record of the current literature about distance and open learning in post-secondary education programs. The authors cover all types of materials from around the world, ranging from brief news items to major research reports and dissertations. Special emphasis is given to Web-based distance education.

Proceedings of International Conference on Sustainable Expert Systems - Subarna Shakya 2021-03-30

This book includes papers on intelligent expert systems and sustainability applications in the areas of data science, image processing, wireless communication, risk assessment, healthcare, intelligent social network mining, and energy. The recent growth of sustainability leads to a progressively new era of computing, where its design and deployment leverages significant impact on the intelligent systems research. Moreover, the sustainability technologies can be effectively used in the progressive deployment of various network-enabled technologies like intelligent sensors, smart cities, wearable technologies, robotics, web applications and other such Internet technologies. The thrust of this book is to publish the state-of-the-art research articles that deals with the design, development, implementation and testing of the intelligent expert systems and also to provide an overview of the sustainable management of these systems. *Promoting University-Industry Collaboration in Sri Lanka* - Kurt Larsen 2016-06-28 Strong science, technology, and innovation links between universities and industry are of critical importance to Sri Lanka as it strives to become an upper-middle-income country. This report presents an overview of current U-I collaboration in Sri Lanka by analyzing

responses to a survey of companies and university departments in 2015. Data from the 2015 survey are compared with data from a similar survey in 2007 to identify trends over time. The study examines current policies to promote U-I collaboration in Sri Lanka, highlights some good practices in other countries, and suggests possible ways that Sri Lanka may be able to strengthen U-I collaboration. The report is intended primarily for policy makers in the fields of higher education, research, and innovation, as well as for researchers in companies, universities, and research institutes who are already collaborating in public-private partnerships or are planning to do so. The responses show that the majority of existing links between Sri Lankan universities and companies are short-term, informal interactions with low direct transfer of knowledge and innovation. However, the survey findings also show a growing emphasis on deeper and more demanding types of collaboration, such as joint Research and Development activities, prototype testing, and spin-offs, even though these remain relatively uncommon. Key recommendations to strengthen U-I collaboration are:

- As part of the national Science, Technology, and Innovation Policy 2016†“2020, develop and implement a national plan to upgrade the country’s research infrastructure, in line with national research and innovation priorities.
- Strengthen Research and Development funding schemes for joint projects between universities/research institutes and companies, based on national and international experiences.
- Define and implement clear intellectual property rights rules for publicly funded research to encourage the use of research results and ensure effective and timely legal protection of intellectual property.
- Establish open innovation spaces and business incubators at universities and make available seed money for faculty and students to develop start-ups.
- Strengthen the U-I interaction cells at universities with professional expertise in technology transfer and business model development.
- Establish opportunities for master’s and PhD students to pursue targeted research projects in companies as part of their study.

Embattled Media - William Crawley 2014-12-31

Embattled Media is the first book to look comprehensively at the evolution of news media in post-colonial Sri Lanka, with a focus on media policy, law and education. It offers valuable insights into the importance of independent media for democratic governance in the wider South Asian region. The book reviews the role of new media platforms in widening the scope for public debate. Further, it provides a detailed analysis of the existing media laws and policies and of campaigns to reform them. It also focuses on the role of institutions in media education by providing a comprehensive analysis of existing media curricula and underlining the importance of improved media literacy and introduction of Right to Information Act for a healthy democracy. The contributors to this volume, including leading journalists, broadcasters, practitioners in public law, media academics and analysts, write from extensive experience.

Quality Assurance in Distance Education and E-learning - Insung Jung 2013-04-18

Quality Assurance in Distance Education and E-Learning: Challenges and Solutions from Asia documents the existing regulatory framework covering quality assurance (QA) systems in distance education (DE) in a number of Asian countries. It draws on the knowledge and experience of 16 selected DE/e-learning institutions of Asia and reveals the respective development of QA systems and procedures within these providers/programmes. The endeavour towards developing QA systems through various stages of testing and development is in response to the growing public concern for the quality of DE as well as staff aspirations for quality. This book, through the selection of cases from the aforementioned institutions, covers a wide range of QA systems and perspectives of quality in DE. These cases present good practices in QA for DE/e-learning, analyse challenges in assuring the quality of DE products and services, offer possible solutions to meet those challenges, and present lessons for other DE providers.

A.C.U. Bulletin of Current Documentation - 1992

Distance and Blended Learning in Asia - Colin Latchem 2009-07-15

Distance and Blended Learning in Asia is a

unique and comprehensive overview of open, distance learning (ODL) and information and communication technology (ICT) in Asian education and training. Broad in coverage, this book critically examines ODL and ICT experiences from Japan to Turkey and from Sri Lanka to Mongolia - drawing conclusions from the successes and failures, and recommending ways in which planning, management and practice may be developed for the world's largest concentration of adult open and distance learners. This pioneering book draws on Asian theory, research and practice to identify the strengths, weaknesses and challenges in all sectors of Asian education and training. It critically and insightfully discusses the ideas, skills and practices that are necessary to advance knowledge in leadership and management, professional development, innovation and quality assurance and research and diffusion. Distance and Blended Learning in Asia provides an insightful, informative and critical review of ODL / ICT developments in schools, open schooling, colleges, universities, workplace training, professional development and non-formal adult and community education. The book is an invaluable reference for ODL / ICT professionals, educators and students anywhere in the world, and is essential reading for all of those involved in ODL / ICT in Asia.

World List of Universities / Liste Mondiale des Universités - F. Eberhard 2020-10-26

Skill Formation Regimes in South Asia - Markus Maurer 2011

In the face of accelerated economic globalisation, many of the industries in economically less developed countries have become more technology-intensive. Skill formation processes, both inside and outside firms, are therefore changing. This study scrutinises such transformations by comparing - from the perspective of historical institutionalism - the skill formation regimes of the garment industries in Sri Lanka and Bangladesh. It sheds light on the differences between the trajectories of the in-firm skill formation regimes of the two countries, and reveals the important part that varying paths of educational development in both countries have played in shaping these trajectories. At the same

time, the study shows how, in both countries, state-led skill formation regimes have been transformed not only by market forces and the growing importance of corporate business interests, but also by the social demand for educational credentials.

Web-Based Learning and Teaching Technologies: Opportunities and Challenges

- Aggarwal, Anil K. 1999-07-01

During the past two decades, telecommunication technologies combined with Web-enabled technologies have created a new technology-based focus, Web-based learning and teaching. This new area has changed the concept of education around the world, creating new challenges and opportunities offered by this new technology-based concept. Web-Based Learning and Teaching Technologies: Opportunities and Challenges addresses many issues, trends, opportunities and problems facing colleges and universities in the effective utilization and management of Web-based learning and teaching technologies.

Digital Twins and Healthcare: Trends, Techniques, and Challenges - Gaur, Loveleen 2022-11-25

The healthcare industry is starting to adopt digital twins to improve personalized medicine, healthcare organization performance, and new medicine and devices. These digital twins can create useful models based on information from wearable devices, omics, and patient records to connect the dots across processes that span patients, doctors, and healthcare organizations as well as drug and device manufacturers. Digital twins are digital representations of human physiology built on computer models. The use of digital twins in healthcare is revolutionizing clinical processes and hospital management by enhancing medical care with digital tracking and advancing modelling of the human body. These tools are of great help to researchers in studying diseases, new drugs, and medical devices. Digital Twins and Healthcare: Trends, Techniques, and Challenges facilitates the advancement and knowledge dissemination in methodologies and applications of digital twins in the healthcare and medicine fields. This book raises interest and awareness of the uses of digital twins in healthcare in the research community. Covering topics such as

deep neural network, edge computing, and transfer learning method, this premier reference source is an essential resource for hospital administrators, pharmacists, medical professionals, IT consultants, students and educators of higher education, librarians, and researchers.

Childhood in South Asia - Jyotsna Pattnaik
2006-01-01

The book has drawn an interdisciplinary pool of authors, some of whom are natives of South Asian countries and others who have been involved extensively in the region through their affiliations with various international organizations. The book represents children's issues in six South Asian countries: India, Afghanistan, Pakistan, Sri Lanka, Nepal, and Bangladesh. The authors in the book critically examine issues facing children in South Asia, reveal inadequacies of governmental policies and programs for children, and offer vision for a better childhood for South Asia's children. The United Nation's Convention on the Rights of the Child, UNCRC, serves as a framework for the book.

Teaching in a Digital Age - A. W Bates 2015

10000 International & American Colleges and Universities - Nam H Nguyen 2018-06-05
is an eBook to give higher education to people by giving them excellent schools' URLs around the world. The parents and students deserve to know, before they enroll, that the schools they've chosen will deliver the value by helping students compare the value offered by colleges and on holding institutions accountable for preparing their students to be successful. 10000 International & American Colleges and Universities will help you anywhere you go; it is a quick and easy reference tool that has just the Colleges and Universities with URL you want to check out! Just remember one thing that learning never stops! Read, Read, Read! And Write, Write, Write!

[Handbook of Open, Distance and Digital Education](#) - Olaf Zawacki-Richter 2023-01-01

This open access handbook offers a one-stop-shop for both new and established researchers, educators, policy makers and administrators in the field of open, distance and digital education (ODDE) to gain a comprehensive overview of the

history, theory and practice at all levels of ODDE, and at the same time stimulates in-depth discussions on various themes and issues of ODDE for today and future. Researchers, scholars and students in the field of ODDE can use this handbook as a major reference to conduct their own research and learning agendas. To cover the field comprehensively, the handbook is structured following the 3M framework developed by one of the chief editors Zawacki-Richter. The 3M framework categorizes the major research areas and issues in ODDE on three levels. Accordingly, the handbook is divided into six sections in total, two section at each of the three levels: 1) Macro Level - ODDE Systems and Theories, 2) Meso Level - Institutional Perspectives, Management and Organization, and 3) Micro Level - Learning and Teaching in ODDE. This is an open access book. *The Psychology of Education* - Martyn Long 2010-11-05

Written in an accessible and engaging style, this second edition of *The Psychology of Education* addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education

Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.

Structural Equation Modeling Approaches to E-Service Adoption - Akgül, Yakup 2019-04-19

With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems. While highlighting topics such as e-commerce, internet banking, and technology acceptance, this publication explores the understanding of today's e-services in a dynamic and complex environment, as well as the methods within the field of information systems and information technologies. This book is ideally designed for academics, students, managers, and scholars interested in the up-and-coming research surrounding the field of information technology.

Economic Policy in Sri Lanka - Saman Kelegama 2004-12-08

The essays in this volume, written by well-known economists and social scientists, shed light on the intense national debates that accompanied the making of policy decisions in Sri Lanka. Studying the country's economy under six main headings: the ideology and strategy of economic development; macro-economic policy; the development of agriculture, industry and technology; employment and labour; institutional issues and governance; and social welfare, the book presents a comprehensive picture of contemporary Sri Lanka's economy.

Reframing Intellectual Property Law in Sri Lanka - Althaf Marsoof 2022-12-31

This book is a reflection on domestic intellectual property lawmaking from a developing country's perspective. It focuses on Sri Lanka—a South Asian jurisdiction with a socio-economic, cultural, and political landscape similar to other

developing nations in the region, but the intellectual property regime of which has been less explored. The aim of this book is to address the discrepancies, gaps, and flaws in the national intellectual property legal framework of Sri Lanka. In doing so, the book considers Sri Lanka's obligations under TRIPS and other related intellectual property treaties to which the country is a party. The book also examines approaches adopted by developing countries in the region and beyond, as well as other more developed nations, in calibrating Sri Lanka's domestic intellectual property regime to better address the country's domestic needs and national interests. The approach adopted in this book is of relevance, more generally, to policymakers, legislators, legal academics, scholars, jurists, legal practitioners and judges who are keen on exploring the extent to which domestic intellectual property legislation complies with international intellectual property norms and standards and, more importantly, the extent to which domestic law makes use of the flexibilities under international law in addressing domestic needs and national interests.

Open Universities - Ai Mee Seet 1992

Open University - Student Support Services - J. K. Prasanth 2003

Contents: Introduction, Review of Related Literature, Methods of Investigation, Data, Conclusions and Suggestions, Summary.

International Handbook of Distance Education - Terry Evans 2008-02-13

Distance education is arguably one of the major developments in education during the 20th Century. This title explores the array of distance education theories and practices as they have been shaped by the late-20th Century and then positions these in terms of the contemporary circumstances of the 21st Century.

Marine Protected Area Needs in the South Asian Seas Region: Sri Lanka - John Pernetta 1993

World List of Universities / Liste Mondiale des Universites - International Association of Universities 2016-01-01

A reference work for all those concerned with the administration of higher education, this volume contains information on universities and other tertiary institutions worldwide.

Sustainable Innovation - Cosmina L. Voinea
2021-04-14

The most important theme of the discourse on sustainable development and sustainability challenges concerns the relationship between innovation and sustainability. This book represents a realistic critical overview of the state of affairs of sustainable innovations, offering an accessible and comprehensive diagnostic point of reference for both the academic and practitioner worlds. In order for sustainable innovation to truly become mainstream practice in business it is necessary to find out how organizations can strategically and efficiently accommodate sustainability and innovation in such a manner that they accomplish value capturing (for firms, stakeholders, and for society), not merely creating a return on the social responsibility agenda. Addressing this challenge, the book draws together research from a range of perspectives in order to understand the potential shifts and barriers, benefits, and outcomes from all angles: inception, strategic process, and impact for companies and society. The book also delivers insights of (open) innovation in public sector organizations, which is not so much a process of invention as it is one of adoption and diffusion. It examines how the environmental pillar of the triple bottom line in private firms is often a by-product of thinking about the economic pillar, where cost reductions may be achieved through process innovation in terms of eliminating waste and reducing energy consumption. The impact of open innovation on process innovation, and sustainable process innovation in particular, is an underexplored area but is examined in this book. It also considers the role of the individual entrepreneur in bringing about sustainable innovation; entrepreneurs, their small- and medium-sized enterprises (SMEs), as well as the innovation ecosystems they build play a significant role in generating sustainable innovations where these smaller organizations are much more flexible than large organizations in targeting societal needs and challenges. The readership will incorporate PhD students and postgraduate researchers, as well as practitioners from organizational advisory fields.

Multi-religiosity in Contemporary Sri Lanka

- Mark P. Whitaker 2021-09-26

This book presents a collection of original research about every day, innovative, interactive, and multiple religiosities among Sri Lankan Buddhists, Hindus, Muslims, Christians, and devotees of New Religious Movements in post-war Sri Lanka. The contributors examine the unique and innovative religiosity that can be observed in Sri Lanka, which reveals a complex reality of mingled, and even simultaneous, cooperation and conflict. The book shows that innovative religious practices and institutions have achieved a new prominence in public life since the end of Sri Lanka's civil war in 2009. Using the analytic framework of 'innovative religiosity' to allow researchers to look at this question between and across Sri Lanka's plural religious landscape in order to escape both the epistemological and ethnographic isolation of studies that limit themselves to one form of religious practice, the chapters also investigate the extent to which inter-religious tolerance is still possible in the wake of Sri Lanka's religion-involving civil war, and the continuing influence of populist Buddhist nationalism, globalization and geopolitics on Sri Lanka's post-war governance. The book offers a novel approach to the study of post-conflict societies and furthers the understanding of the status of tolerance between religious practitioners in contexts where both ethnic conflict and multi-religious sites are prominent. This book is an important resource for researchers studying Anthropology, Asian Religion, Religion in Context and South Asian Studies.

The Palgrave International Handbook of Action Research - Lonnie L. Rowell 2016-10-26

The Palgrave International Handbook of Action Research offers a vivid portrait of both theoretical perspectives and practical action research activity and related benefits around the globe, while attending to the cultural, political, social, historical and ecological contexts that localize, shape and characterize action research. Consisting of teachers, youth workers, counselors, nurses, community developers, artists, ecologists, farmers, settlement-dwellers, students, professors and intellectual-activists on every continent and at every edge of the globe, the movement sustained and inspired by this community was born of the efforts of

intellectual-activists in the mid-twentieth century specifically: Orlando Fals Borda, Paulo Freire, Myles Horton, Kurt Lewin. Cross-national issues of networking, as well as the challenges, tensions, and issues associated with the transformative power of action research are explored from multiple perspectives providing unique contributions to our understanding of what it means to do action research and to be an action researcher. This handbook sets a global action research agenda and map for readers to consider as they embark on new projects.

Distance edu Different Countries - D.b.rao 2007

Science, Technology Policy and the Diffusion of Knowledge - Tim Turpin 2007-01-01

The Asia Pacific has emerged as one of the most dynamic regions in the world, presenting a variety of social and economic experiences and responses to global pressures. In this book twelve country case studies explore the ways in which national science, technology and innovation policies are evolving in response to globalization. The editors argue that the national innovation system (NIS) perspective is driving policy regimes toward new approaches in policy intervention. Underlying the new policy agenda is a concern with reframing the role for science, technology and innovation institutions including higher education and integrating local community, national and global technology objectives. Presenting a broad analysis, the book will be of great interest to policy analysts and practitioners concerned with science, technology and innovation policy. It will also appeal to academic and postgraduate students concerned with innovation and industrial development, as well as scholars and practitioners engaged in regional development and international business in the Asia Pacific region.

Effective Public Administration Strategies for Global New Normal - Perfecto G. Aquino Jr. 2022

This book analyzes the recent discussions on the practices, issues, challenges and strategies of various public organizations and service organizations in light of the ongoing global pandemic. The book investigates how such organizations have managed to sustain the changes brought on to operations due to the new

normal business environment and, in doing so, provides lessons and insights on how similar strategies could be implemented successfully in other organizations. This book would be a valuable read for policy makers, decision makers of public organizations, and scholars. .

Improving University And College Teaching - S.b.mohanty 2004

Web-Based Instructional Learning - Khosrow-Pour, D.B.A., Mehdi 2001-07-01

Advances in technology are making Web-Based Education (WBE) a reality, but there are still many questions that need to be answered. These questions and more are addressed in Web-Based Instructional Learning.

Innovative Strategies in Higher Education for Accelerated Human Resource

Development in South Asia - Asian Development Bank 2016-06-01

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

The International Journal of Indian Psychology, Volume 4, Issue 2, No. 95 - IJIP.In 2017-03-30

Culture and Online Learning - Insung Jung 2015-03-16

Culture plays an overarching role that impacts investment, planning, design, development, delivery, and the learning outcomes of online education. This groundbreaking book remedies a dearth of empirical research on how digital

cultures and teaching and learning cultures intersect, and offers grounded theory and practical guidance on how to integrate cultural needs and sensibilities with the innovative opportunities offered by online learning. This book provides a unique analysis of culture in online education from a global perspective, and offers:

- * An overview of the influences that culture has on teaching, online learning, and technology
- * Culture-sensitive instructional design strategies and teaching guidelines for online instructors and trainers
- * Facilitation and support strategies for online learners from different cultures
- * An overview on issues of

design, development, communication, and support from a cross-cultural perspective

- * An overview of how online education is perceived, planned, implemented, and evaluated differently in various cultural contexts

Written by international experts in the field of online learning, this text constitutes with a comprehensive comparative introduction to the role of culture in online education. It offers essential guidance for practitioners, researchers, instructors, and anyone working with online students from around the world. This text is also appropriate for graduate-level Educational Technology and Comparative and International Learning programs.
