**Car Guys vs. Bean Counters** - Bob Lutz 2011-06-09

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

**All-in Fighting** - W. E. Fairbairn 2021-05-06

The author of this concise guide to unarmed combat and self-defence is a legend. W. E. Fairbairn (1885-1960) spent over thirty years in the tough environment of the Riot Squads of China's Shanghai Municipal Police. In order to lower levels of Police mortality at the hands of Chinese Tongts, he studied ancient Chinese and Japanese martial arts, including Ju-jitsu, and was the first foreigner to be awarded a black belt in the discipline. He developed his own system which he called 'Defendu'. At the outbreak of the Second World War, he was recruited by Britain's Special Operations Executive as an Instructor in unarmed combat and expounded the deadly mysteries of attack and defence to scores of trainee agents about to be dropped into occupied Europe. His methods were approved and officially adopted throughout the British army. Fairbairn also developed weapons and defence aids such as bullet proof vests. He is best known as the co-inventor of the famous Sykes-Fairbairn knife. In this book he expounds his distilled experience of unarmed combat. Fully illustrated, it shows how to deliver deadly blows with hand, fist, knee and boot; wrist, bear- and strangle holds (and how to break them); how to throw an enemy, and how to break their backs; how to disarm a pistol-wielding attacker; and securing a prisoner. The book also contains a chapter on the use of the rifle in close combat by Captain P. N. Walbridge.

**Lemon-Aid New Cars and Trucks 2012** - Phil Edmonston 2011-12-03

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation. Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea. **Autobiographical International Relations** - Naeem Inayatullah 2010-12-03

This volume provides a novel approach to international relations. In the course of fifteen essays, scholars write about how life events brought them to their subject matter. They place their narratives in the larger context of world politics, culture, and history. Autobiographical International Relations believes that the fictive distancing associated with academic prose creates disaffection in both readers and writers. In contrast, these essays demonstrate how to reengage the "I" while simultaneously sustaining theoretical precision and historical awareness. Authors highlight their motives, their desires, and their wounds. By connecting their theoretical and practical engagements with their needs and wounds, and by working within the overlap between theory, history, and autobiography, these essays aim to increase the clarity, urgency, and meaningfulness of academic work. These essays are autobiographical, but focused on the academic aspect of authors' lives. Specifically, they are set within the domain of international relations/global politics. They are theoretical, but geared to demonstrate that theoretical decisions emerge from theorists' needs and wounds. Theoretical precision, rather

than being explicitly deduced, is instead immanent to the autobiographical and the historical/cultural narrative each author portrays. And, these essays are framed in historical/cultural terms, but seek to bind together theory, history, culture, and the personal into a differentiated and vibrant whole. This book moves the field of International Relations towards greater candidness about how personal narrative influences theoretical articulations. No such volume currently exists in the field of international relations.
