Mami Wata - Henry John Drewal 2008

This book traces the visual cultures and histories of Mami Wata and other African water divinities. Mami Wata, often portrayed with the head and torso of a woman and the tail of a fish, is at once beautiful, jealous, generous, seductive, and potentially deadly. A water spirit widely known across Africa and the African diaspora, her origins are said to lie "overseas," although she has been thoroughly incorporated into local beliefs and practices. She can bring good fortune in the form of money, and her power increased between the fifteenth and twentieth centuries, the era of growing international trade between Africa and the rest of the world. Her name, which may be translated as "Mother Water" or "Mistress Water," is pidgin English, a language developed to lubricate trade. Africans forcibly carried across the Atlantic as part of that "trade" brought with them their beliefs and practices honoring Mami Wata and other ancestral deities. Henry John Drewal is the Eजूe-Bascom Professor of African and African Diaspora Arts at the University of Wisconsin-Madison. Other contributors include Marilyn Houlberg, Bogumil Jewsiewicki, Amy L. Noell, John W. Nunley, and Jill Salmons.

One man's search for light in the darkness, identity out of contradiction, purpose out of irrelevance, and a path out of the uncertainty God is mobilizing an army and Steve is all in. This army will consist of men who have intimate and personal experience with the weapons of the world and spiritual warfare. But something is off and holding him back. He spends a year praying, searching, and operating in faith that the Lord will, one day, reveal answers to his questions. That day has finally arrived. Joined and guided by Shepherd, Steve is thrust into an epic story of his past and his heritage. He learns how the connection between sin and soul ties were passed down from father to son, spanning four generations, as he experiences how his little story fits into the larger story. His quest leads him to a River which opens his eyes to the nature of his wilderness. Can his history of denial, betrayal, hatred, and rejection be used as a part of God's plan to break the chains of bondage holding men, like him, back? The fox maneuvers, the coyote strikes, and the wolf prowls, but the rooster still crows. The lost sheep will be found. It is possible for any man to break free from his shadows and find the River in the wilderness wasteland.

The word "talent" by its use in present times connotes the inherent gifts and abilities in people, hence the parable has been used to teach on the stewardship of our God-given gifts and talents. Stuart Wilde's money book, his fifth work, deals with the E.S.P. of easy money and the art of being in the right place at the right time, with the right idea and the right attitude. Prophet, Arise - John Eckhardt 2015-07-07

Arise, shine, for your light has come, and the glory of the Lord has risen upon you. For the darkness shall cover the earth and deep darkness the peoples; but the Lord shall rise upon you, and His glory shall be seen upon you. —Isaiah 60:1-2, MEV

Advances in Mathematics Research - Albert R. Baswell 2019-02-28

This volume commences with an introduction to the solution attractor theory of local search systems. Here, a local search algorithm is treated as a discrete dynamical system and its search behavior is studied from the perspective of dynamical systems. Following this, this collection examines the three-year period of 1966 to 1968 when the invariant integral of fracture mechanics became popular, as well as 2015 to 2016 when the neoclassic cosmology based on the invariant integral came about. The authors go on to argue how, in the history of philosophy, the meaning of the term to be has been disputed between two research programmes: The Platonic-Aristotelian and the Pythagorean-Parmenidean-Democritean programmes through Hobbes and Boole up to Peano. The history of science and philosophy goes hand in hand with the question of the nature of mathematical objects. By implication, this was known by the Pythagoreans, even though it was not expressed in the plane of a directly named problem. The authors propose that that strict Platonism in mathematics is not possible, though may be considered in many cases. Also in this collection, perform building-scale analysis is performed, and the use of a convex map is considered. However, partitioning an architectural space is not easy due to its ambiguity. As such, an analysis method is proposed which may decompose the space with moderate granularity. One study sets out to determine the feasibility of using a hidden Markov model to assess whether goats were in estrus. Mammalian behavior has typically been studied based on observations, but direct observation requires substantial time and effort if the number of mammals observed is high or the observations are obtained over a long period of time. Thus, a machine-learning method such as a hidden Markov model may be suitable. A literature review of electric circuits and mathematical models of electric power transmission lines is provided, approaching a classification of the models regarding the nature of their parameters and frequency dependence. These models are important in predicting the voltage and current available, which aids in meeting safety and quality demands. The authors conclude with a summary of some results concerning the problem of computing a proper rational parametrization Q from P . In particular, they present an algorithm that computes a parametrization Q of V such that $\deg(-Q) \leq \deg(-P)$. If $\deg(-Q) = 1$, then Q is proper and the reparametrization problem is solved.

Security Challenges and Management in Modern Nigeria - Abimbola Adesoji 2019-01-15

This collection of essays explores the critical and fluid nature of security challenges that have plagued Nigeria since colonial times. Insecurity in diverse forms remains the bane of growth and progressive development in the country, and has the capability to derail a society no matter how sophisticated. What has generated insecurity at the macro- and micro-levels? How has insecurity been tackled? Why have security challenges escalated particularly in the post-independence period? What lessons could be learnt from the way security matters have been (mis)handled in the past? This volume presents chapters on the historical roots and antecedents of security challenges, and considers the nexus between the economy, political leadership and development, and its impacts on security in modern Nigeria. It also explores the effectiveness of the strategies employed to address security challenges, and discusses why some security challenges have lingered.

Chief Obafemi Awolowo - Adedara S. Oduguwa 2012-05

Chief Obafemi Awolowo: The Political Moses is a story of a man who dedicated the entirety of his life to serve humanity and the development of mankind. The Author makes use of the noun Moses to depict the tiresome journey of an activist who fought rigorously alongside others to gain independence for his people. The fact that his ambition to be president of Nigeria was foiled is in itself a matter of discussion transcending the Nigerian political debate till now. As late Chief Odumegwu Ojukwu once said "Awolowo, the Best President Nigeria never had". The book investigates the celebrated treasonable felony of 1962; bringing into focus the case hearings and the political unrest of the period, party system and political parties in Nigeria, Nigeria electoral processes from Pre-colonial era to the fourth republic, review of political prisoners around the world, and making succinct recommendations for Nigeria electoral processes. Chief Obafemi Awolowo: the political Moses unravels a political betrayer by major party members of Action Group likening this to the betrayal of Jesus Christ by Judas Iscariots. It is a must read book for researchers, students of political science and law, lecturers, and anybody that aspires to be great.
