Binti the Baboon - Deborah
Bland Lane 2008-07
"Binti The Baboon" is a great
book for children, containing
three stories about the

adventures of a young baboon
who was orphaned after birth.
"Binti The Baboon" series takes
the reader on a sometimes
mischevious adventure in the
African bush, teaching to
protect and enjoy the wildlife
of Africa. The characters and
events in the series are taken
from real-life people and the
experiences of the author's
travels in Africa.

Facts about the Baboon -
Lisa Strattin 2019-07-17

Children's author Lisa Strattin presents: *Facts About the Baboon: A Picture Book For Kids*. This educational book presents facts along with full color photographs and carefully chosen words to teach children about the Baboon. Packed with facts about the Baboon, your children or grandchildren will enjoy learning from start to finish while they read this book. This book was a pleasure to write, and knowing that children learn from it made it all worthwhile! If you want to learn about the Baboon, you will enjoy this book. Learn many interesting facts and see some beautiful photographs as the aardvarks are seen in their natural habitat. The gorgeous photographs will keep your child engaged from beginning to end. Included in the paperback version are some coloring pages for your child! Note: This book is suitable for children 5 years or age and older, although younger children will enjoy it if you share it with them. Grab your copy NOW by clicking the

buy button at the top right of the page.

Binnie the Baboon and the Big Worries - Karen Treisman
2021-08-19

Binnie is an energetic baboon, who bounces around the lush green mountains of Rwanda in East Africa. But like many of us, Binnie often feels worried, fearful, and stressed, and these worries can get in her way! What if she gets lost in the jungle, or her family gets sick? What if no one likes her? Sometimes she even worries about the fact she's worried; and if she isn't worried, well why not?! This story will help children aged 5-10 and the adults around them to understand why they feel anxious. It describes what

children can do to help reduce these feelings and become their very own worry wizards and worry warriors. About this series: Dr. Treisman's Big Feelings Stories are written for adults to read with kids aged 5-10 to help children to understand their feelings. If you enjoy this book, why not check out Dr. Treisman's Activity Books series; Binnie the Baboon Anxiety and Stress Activity Book features the same story and comes with an abundance of extra guidance for adults and a wealth of creative expansion activities and photocopyable worksheets.

Everything You Should Know About Gorillas and Baboons - Anne Richards

2017-09-22

National Learning Association presents: GORILLAS AND BABOONS Are your children curious about Gorillas and Baboons? Would they like to know if they are aggressive animals? Have they learnt how similar baboons are to humans or what Silverback gorillas are? Inside this book, your children will begin a journey

that will satisfy their curiosity by answering questions like these and many more!
EVERYTHING YOU SHOULD KNOW ABOUT: GORILLAS AND BABOONS will allow your child to learn more about the wonderful world in which we live, with a fun and engaging approach that will light a fire in their imagination. We're raising our children in an era where attention spans are continuously decreasing. National Learning Association provides a fun, and interactive way of keep your children engaged and looking forward to learn, with beautiful pictures, coupled with the amazing, fun facts. Get your kids learning today! Pick up your copy of National Learning Association EVERYTHING YOU SHOULD KNOW ABOUT: GORILLAS AND BABOONS book now! brilliant solution, a baboon named Jack. Jim trained Jack to help him both at home and at the depot. But when the railway authorities and the public discovered a monkey on the job, Jack and Jim had to work together to convince everyone that they made a great team. This inspiring true story celebrates the history of service animals and a devoted friendship.

African Elephants and Baboons
- Janey Levy 2021-07-15

Everyone wants to have someone to count on when the going gets tough. Often it's family, but in the animal world, support sometimes comes from unlikely places. African elephants and olive baboons have formed a surprising mutualistic relationship that helps carry them through difficult times. Young readers will delight in what they learn about these two animals and the bond they share. Thrilling images, fun facts, and a graphic organizer support the accessible narrative. Important science concepts are shared through this fun reading

experience.

The Baboon in Biomedical Research - John L. VandeBerg
2009-06-04

Nonhuman primates have played critical roles in biomedical research, and they are among the few animals whose use in research continues to increase. The scientific value of nonhuman primates derives from their close phylogenetic proximity to man and their consequent anatomic, physiologic, and genetic similarities to man. Only nonhuman primates can provide adequate models for many complex physiological and disease processes of humans. The baboon is a relative newcomer to the repertoire of nonhuman primates used in biomedical research. However, in less than 50 years since its first use in the U. S. , it has become one of

Downloaded from
vitaenet.aurora.edu on by
guest

the most popular laboratory primate species. It is larger than the other widely used monkey species, making it advantageous for many types of experiments and technological developments. It is extraordinarily hardy and highly fecund in captivity. It closely resembles humans in a variety of physiological and disease processes, such as cholesterol metabolism, early stages of atherosclerosis, and alcoholic liver disease. Its chromosomes closely resemble those of humans, and many genes of the two species lie in the same chromosomal order. Among all primates, baboons are the most widely used models for the genetics of susceptibility to complex diseases and they are the first nonhuman primate for which a framework genetic linkage map was established. In addition, the baboon genome is currently being sequenced, and as a result the utility of this species for biomedical research will be dramatically increased.

Dream Big - Kat Kronenberg
2017-01-10

Set long ago in the heart of the African savanna, Dream Big—a mythological fable—follows moody Baboon as he discovers a powerful secret. One by one, Caterpillar, Tadpole, and Flamingo gaze up at the night sky and wish upon a star for

their wildest dreams. Baboon insists these dreams could never come true. But when he sees Caterpillar turn into a winged butterfly, Tadpole into a dancing frog, and Flamingo into a beautiful pink bird, Baboon realizes that a transformative power exists between the stars and the animals once they truly believe in themselves and their dreams. When Baboon tries out this secret, CATCH-M, his marvelous, miraculous, wished-upon Star, whooshes down from the heavens to wham! ignite the courage in his chest. Read on to see if his dream comes true too . . . Dream Big's inspirational message makes it a perfect gift for dreamers of all ages, from children to young adults about to enter a new chapter in their lives. Together we can all be inspired to identify and pursue our dreams, no matter how big or impossible they may seem.

An Introduction to Theories of Human Development - Neil J Salkind 2004-01-22

An Introduction to Theories of Human Development provides a comprehensive view of the primary theoretical models of human development including those from the biological, psychoanalytic, behavioral, and cognitive developmental perspectives. Along with a brief discussion of a historical background for each of these approaches, this book examines the application of these theories to various aspects of human development, such as the effectiveness of early intervention, individual differences, adolescence, and sociobiology.

The Causes of Exclusion - Cedric Cullingford 1999-10-01

This report synthesizes two approaches to a topical problem: the concern with social deviancy and crime which focuses on failure; and research on educational development which focuses on success. The book explores how environmental experiences (including parenting and

bullying) play a role.

Neo-Imperialism in Children's Literature About Africa - Yulisa Amadu Maddy 2008-12-28

In the spirit of their last collaboration, Apartheid and Racism in South African Children's Literature, 1985-1995, Yulisa Amadu Maddy and Donnarae MacCann once again come together to expose the neo-imperialist overtones of contemporary children's fiction about Africa. Examining the portrayal of African social customs, religious philosophies, and political structures in fiction for young people, Maddy and MacCann reveal the Western biases that often infuse stories by well-known Western authors. In the book's introductory section, Maddy and MacCann offer historical information concerning Western notions of Africa as "primitive," and then present background information about the complexity of feminism in Africa and about the ongoing institutionalization of racism. The main body of the study

contains critiques of the novels or short stories of eleven well-known writers, including Isabel Allende and Nancy Farmer--all demonstrating that children's literature continues to misrepresent conditions and social relations in Africa. The study concludes with a look at those short stories of Beverley Naidoo which bring insight and historical accuracy to South African conflicts and emerging solutions. Educators, literature professors, publishers, professors of Diaspora and African studies, and students of the mass media will find Maddy and MacCann's critique of racism in the representation of Africa to be indispensable to students of multicultural literature.

Good Night, Baboon! - Sabrina Moyle 2020-03-31

Good Night, Baboon! stars one very cheeky baby baboon who's just too jazzed to slumber as he bounces through a countdown of sleepy animals brushing their teeth, reading bedtime stories, until finally: 2 lazy llamas, all tucked in snug. Now look who's ready for . . . 1 big hug! With its vibrant art and cheerful rhyming text, plus a countdown from one to ten, the book is a joy for grown-ups and children to read aloud together. Created by Eunice Moyle and Sabrina Moyle, the sister team behind the award-winning design studio Hello!Lucky, Good Night, Baboon! features the bright and appealing style that has made their previous children's books bestsellers and their stationery and other products so popular across all ages.

Play and Exploration in Children and Animals - Thomas G. Power 1999-11

Play is a paradox. Why would the young of so many species-- the very animals at greatest risk for injury and predation-- devote so much time and energy to an activity that by definition has no immediate purpose? This question has long puzzled students of animal behavior, and has been the focus of considerable empirical investigation and debate. In this first comprehensive and state-of-the-art review of what we have learned from decades of research on exploration and play in children and animals, Power examines the paradox

from all angles. Covering solitary activity as well as play with peers, siblings, and parents, he considers the nature, development, and functions of play, as well as the gender differences in early play patterns. A major purpose is to explore the relevance of the animal literature for understanding human behavior. The nature and amount of children's play varies significantly across cultures, so the author makes cross-cultural comparisons wherever possible. The scope is broad and the range multidisciplinary. He draws on studies by developmental researchers in psychology and other fields, ethologists, anthropologists, sociologists, sociolinguists, early childhood educators, and pediatricians. And he places research on play in the context of research on such related phenomena as prosocial behavior and aggression. Finally, Power points out directions for further inquiry and implications for those who work with young children and their parents.

Researchers and students will find Play and Exploration in Children and Animals an invaluable summary of controversies, methods, and findings; practitioners and educators will find it an invaluable compendium of information relevant to their efforts to enrich play experiences.

[101 Amazing Monkey Facts for Kids: Monkey Books for Children](#) - Ben Haydock
2017-04

[In Quest of the Sacred Baboon](#)

- Hans Kummer 2017-03-14

In a tale that begins at a zoo in Zurich and takes us across the deserts of Ethiopia to the Asir Mountains in Saudi Arabia, Hans Kummer recreates the adventure and intellectual thrill of the early days of field research on primates. Just as Jane Goodall and Dian Fossey introduced readers to the fascinating lives of chimpanzees and gorillas, Kummer brings us face to face with the Hamadryas baboon. With their furry white mantles and gleaming red hindquarters, the Hamadryas appear frequently in the art of the ancient Egyptians--who may

have interpreted the baboons' early morning grooming rituals as sun-worshipping rites. Back then, Hamadryas were thought to be incarnates of Thoth, the god of wisdom; today they are considered to have one of the most highly structured social systems among primates, very close, in some respects, to that of humans. In the 1960s, Kummer, after conflicts with nomadic warriors, managed to track down these elusive baboons near the Danakil Desert, and then followed them from dawn to dusk on their treks from one feeding place to another. His scientific account of this period reads like a travel memoir as he describes his encounters with the Hamadryas and the people with whom they share the desert. Winding his way through cliffs and stubble, Kummer records the baboons' social life, from the development of pair relationships to the way an entire group decides where to march each day. Much like the human nomads who cope with the harsh demands of the

desert environment, the Hamadryas maintain a society that is strict and patriarchal in its details but multilayered and flexible in its largest units. We learn, for example, of the Hamadryas' respect for possession that protects family structure and of the cohesion among family leaders that lessens the threat of battle. At the same time, clear-cut personalities emerge from Kummer's account, drawing us into the life stories and power struggles of individual baboons. Whereas this rich detail holds many implications for natural scientists, the colorful way it comes to life makes for a compelling book bound to entertain and educate all readers. Originally published in 1995. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while

presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

African Folktales - Retold 2 -

Susan Viriri 2021-03-20

African Folktales - Retold 2 is the second in the series of children's books by Susan Viriri. Following the success of the first set of tales this book focuses on the 'Do to others as would like them to do for you in return' moral. African

grandparents were socially tasked with teaching and moulding children about society as they grew and interacted with others while playing. Those that were not being taught at home would in turn learn from those that were. Indeed, the need to present these stories using animals that could 'talk' also taught the children the characteristics of the animals simultaneously and to give them the respect accorded to them by nature. So, what better way is there to learn about animals and their behaviour than from their 'own mouths'! (Pun intended). Play, enjoy, and learn.
