**In the Metro** - Marc Augé 2002

Tourists climb the Eiffel Tower to see Paris. Parisians know that to really see the city you must descend into the metro. In this revelatory book, Marc Augé takes readers below Paris in a work that is both an ethnography of the city and a personal narrative. Guiding us through history, memory, and physical space, Augé juxtaposes the romance of the metro with the reality of multiethnic urban France. His work is part autobiography, with impressions from a lifetime riding the trains; part meditation on self and memory reflected in the people and places underneath Paris; part analysis of a place where the third world and the first world meet, where remnants of cultures move and press together; and part a reflection on anthropology in an era of globalization and urban development. Although he is a pillar of French thought, *In the Metro* is Augé's first major critical and creative work translated into English. It shows him to be firmly rooted in a tradition of literary ethnography that reaches back to Claude Lévi-Strauss and Michel de Certeau, but also engaged in current theoretical debates in literary and cultural studies. In Augé's idiosyncratic and innovative approach, the act of observing the quotidian is elevated to an art. The writer and his history become part of the field he observes, and anthropology interacts with a site -- urban life -- usually reserved for sociology and cultural studies. Throughout, Augé reveals a passion for his milieu, seeing the metro as a place rich with history and literature -- an eclectic egalitarian society.

Managing the Undesirables - Michel Agier 2011-01-25

'An impassioned and tireless explorer of "useless" and hence "undesirable" populations, Michel Agier asks here about their future: how can they be returned to the human family, brought back from non-existence into the social world, from the camp to the town, from a life without time into history? How can they rediscover a place on the map of the world, and pass from the status of reject to that of subject? Urgent and indispensable reading for all who reflect on action to be taken, or are

called on to take such action.' Zygmunt Bauman --

*Education for the Twenty-first Century : Issues and Prospects* - International Commission on Education for the Twenty-first Century 1998

Containing a selection of texts on education prepared during the work of the International Commission on Education for the Twenty-first Century, this volume bears witness to some paradoxes faced by education: to reconcile divergent aims and trends, to embody both continuity and renewal, to encourage conformity and innovation. These papers are intended to complement existing literature to respond to questions that arose in the course of the Commission's work, and to illuminate specific issues that cross disciplines.

**Critical Theory** - Max Horkheimer 1972-01-01

These essays, written in the 1930s and 1940s, represent a first selection in English from the major work of the founder of the famous Institute for Social Research in Frankfurt. Horkheimer's writings are essential to an understanding of the intellectual background of the New Left and the to much current social-philosophical thought, including the work of Herbert Marcuse. Apart from their historical significance and even from their scholarly eminence, these essays contain an immediate relevance only now becoming fully recognized.

**The Social Construction of Reality** - Peter L. Berger 2011-04-26

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Risques collectifs et situations de crise - Claude Gilbert 2003-09-01

Les risques susceptibles d'affecter les collectivités humaines (risques naturels, technologiques, sanitaires, alimentaires, liés à la rupture de grands systèmes...) et les crises qu'ils suscitent sont au coeur des débats contemporains. Les sciences humaines et sociales ont, depuis une dizaine d'années, développé des recherches nombreuses et diverses sur ces questions considérées comme des problèmes de société cruciaux. Elles ont ainsi introduit de nouveaux cadres d'analyse susceptibles de

changer assez radicalement la compréhension voire la gestion des risques et des crises.

*The New Spirit of Capitalism* - Luc Boltanski 2005

In this major work, the sociologists Eve Chiapello and Luc Boltanski go to the heart of the changes in contemporary business culture. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their organization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization which was founded on employee initiative and autonomy in the workplace - a 'freedom' that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and 'Ben and Jerry') arguing that they practice a more successful and subtle form of exploitation. In a work that is already a classic in Europe, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the Left's critique of the alienation of everyday life - a recuperation that simultaneously undermined the power of its social critique.

**Digital Diplomacy and International Organisations** - Corneliu Bjola 2020-10-30

This book examines how international organisations (IOs) have struggled to adapt to the digital age, and with social media in particular. The global spread of new digital communication technologies has profoundly transformed the way organisations operate and interact with the outside world. This edited volume explores the impact of digital technologies, with a focus on social media, for one of the major actors in international affairs, namely IOs. To examine the peculiar dynamics characterising the IO-digital nexus, the volume relies on theoretical insights drawn from the disciplines of International Relations, Diplomatic Studies, Media, and Communication Studies, as well as from Organisation Studies. The volume maps the evolution of IOs' "digital universe" and examines the impact of digital technologies on issues of organisational autonomy, legitimacy, and contestation. The volume's contributions combine engaging theoretical insights with newly compiled empirical material and an eclectic set of methodological approaches (multivariate regression, network analysis, content analysis, sentiment analysis), offering a highly nuanced and textured understanding of the multifaceted, complex, and ever-evolving nature of the use of digital technologies by international organisations in their multilateral engagements. This book will be of much interest to students of diplomacy, media, and communication studies, and international organisations.

*Ancient Mesopotamia* - A. Leo Oppenheim 2013-01-31

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, *New York Times Book Review Ancient Mesopotamia*—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, *Book Week "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."*—Samuel Noah Kramer, *Archaeology*. A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the *Assyrian Dictionary of the Oriental Institute* and John A. Wilson Professor of Oriental Studies at the University of Chicago.

**Male Roles, Masculinities and Violence** - Ingeborg Breines 2000

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.
