Animal Cell Technology: Developments towards the 21st Century - E.C. Beuvery 1996-02-29

Animal cell technology is a discipline of growing importance, which aims not merely at understanding structure, function and behaviour of differentiated animal cells, but especially at the development of their abilities useful for clinical application. Topics of interest in this regard include: viral vaccines, pharmaceutical proteins and novel applications such as gene therapy and organ culture. Undoubtedly, these Proceedings of the joint Meeting of the European Society for Animal Cell Technology and the Japanese Association for Animal Cell Technology (Veldhoven, The Netherlands, September 1994) review the most recent status of the field, and will be most valuable to anyone actively involved in the culture of animal cells and its applications. The contributions to this volume were strictly selected on the basis of quality and novelty of contents. Kluwer is honoured to be able to add this work to its strongly developing publication programme in cell and tissue culture, which now has its connections to all major Societies in this field worldwide. Audience: Cell biologists, biochemists, molecular biologists, immunologists, virologists and all other disciplines related to animal cell technology, working in an academic environment, as well as in (biotechnology or pharmaceutical) industry.

eLexicography in the 21st Century : New Challenges, New Applications - Sylviane Granger 2010-06

The field of lexicography is undergoing a major revolution. The rapid replacement of the traditional paper dictionary by electronic dictionaries opens up exciting possibilities but also constitutes a major challenge to the field. The eLexicography in the 21st Century: New Challenges, New Applications conference organized by the Centre for English Corpus Linguistics of the Université catholique de Louvain in October 2009 aimed to bring together the many researchers around the world who are working in the fast developing field of electronic lexicography and to act as a showcase for the latest lexicographic developments and software solutions in the field. The conference attracted both academics and industrial partners from 30 different countries who presented electronic dictionary projects dealing with no less than 22 languages. The resulting proceedings volume bears witness to the tremendous vitality and diversity of research in the field. The volume covers a wide range span of topics, including: -the use of language resources for lexicographic purposes, in the form of lexical databases like WordNet or corpora of different types - innovative changes to the dictionary structure afforded by the electronic medium, in particular multiple access routes and efficient integration of phraseology -specialised dictionaries (e.g. SMS dictionaries, sign language dictionaries) -automated customisation of dictionaries in function of users' needs -exploitation of Natural Language Processing tools - integration of electronic dictionaries into language learning and teaching

International Commercial Arbitration Practice: 21st Century Perspectives - Horacio Grigera Naon 2020-11-13

The scope and importance of International Commercial Arbitration (ICA) has expanded exponentially in the last few decades and has become the natural and logical method to resolve international business and economic disputes. This collective work captures the development of ICA from different perspectives and uniquely brings together the ideas, suggestions and perspectives of in-house counsel as the most important users of ICA, along with outside counsel, arbitrators themselves, and major arbitration organizations who all help provide the service. Most, if not all, of the contributing authors have served as counsel or arbitrator in arbitrations and have further contributed, through their writings, teachings or activities in arbitral and other institutions, to the evolution of ICA covered by this collective work. Accordingly, International Commercial Arbitration Practice: 21st Century Perspectives is an indispensable tool for the reader-practitioner, arbitrator, academic, magistrate or student-not only to obtain useful general information on ICA practice today but to gain insightful views as to the influence of this institution in the settlement of international commercial disputes in specific economic areas, industries and commercial activities. International Commercial Arbitration Practice: 21st Century Perspectives brings the process

alive and provides the reader with a useful practice guide whether he or she represents a client participating in an international commercial arbitration, is in-house counsel for a company considering arbitration as a possible method of dispute resolution, or is an arbitrator with cases at hand. The book is organized by Parts which contain thematically related chapters. Part I deals with an overview of key elements in ICA practice and includes chapters on how arbitration is conducted under different legal systems such as common law, civil law, and shari'a law, as well as a chapter on cultural issues in international arbitration. Part II contains geographical regional overviews covering most regions of the world (Western Europe, Russia/NIS countries, Asia (particularly China & Hong Kong and the Indian Subcontinent), Middle East & North Africa, Latin America, the U.S., Canada, and Australia & New Zealand. Part III includes individual industry sector views of how ICA is conducted in individual industry and business sectors such as oil & gas, LNG, mining, construction, telecommunications, satellite communications, intellectual property, sports, banking & finance, insurance & reinsurance, securities, shipping & maritime, corporate shareholder and bankruptcy settings. These chapters are highly instructive because many of them were written by current or former in-house counsel in these industries or, in some cases, by outside counsel who focus on these industries. Part IV of the book describes recent trends at several major global commercial arbitration institutions such as the ICC, ICDR, LCIA, CPR and WIPO. Part V deals with questions of how technology has been changing ICA practice in recent years, including chapters relating to the use of technology by some major arbitral institutions, videoconferencing in ICA, and online arbitration of internet domain name and e-commerce cases.

Crossing the Quality Chasm - Institute of Medicine 2001-08-19

Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Corporate Security in the 21st Century - Kevin Walby 2014-06-18

Finance and Society in 21st Century China - Junie T. Tong 2011

Finance and Society in 21st Century China considers how far the modern economy is disconnected from Chinese culture and history, and questions the common assumption that China has outgrown its reliance on its Western counterparts. Junie Tong applies the work of Belgian economist, banker and social commentator Bernard Lietaer in a specifically Chinese context, highlighting the need to root finance and enterprise in the rhythms and forces within Chinese culture to avoid future chaos and achieve socioeconomic stability in a country now so critical to global well-being.

Paradigm Shifts in 21st Century Teaching and Learning - Orakc?, ?enol 2020-04-24

One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching

practices. Paradigm Shifts in 21st Century Teaching and Learning is an essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.

The Future of the Public's Health in the 21st Century - Institute of Medicine 2003-02-01

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Corporate Sustainability in the 21st Century - Rafael Sardá 2019-01-02

Corporate sustainability needs a rethink. We have entered the human-influenced Anthropocene age, and we are witnessing accelerating changes in earth system processes. Businesses' current initiatives, such as product innovation and pollution reduction, are not enough to combat the intensifying social-ecological challenges that face us. Corporate Sustainability in the 21st Century is an innovative new textbook which provides a fresh conceptual framework for understanding and engaging with sustainability, now and in the future - "Business In Nature." This book critically discusses key concepts and topics related to corporate sustainability, with a focus on corporate sustainability strategies and corporate value chains. Setting itself apart from existing books, it introduces ideas from global ecology and the natural sciences to provide readers with a new language for discussing business and sustainability. This book maintains an international perspective throughout, with a wealth of examples, case studies and discussion questions. It will be a valuable text for students of corporate sustainability; business, nature and society; and environmental studies, and will also be useful for managers seeking a new perspective on how being "green" can fit with business goals.

Theoretical Models and Processes of Literacy - Donna E. Alvermann 2018-10-03

The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research, broadly defined, and features both cutting-edge and classic contributions from top scholars. Two decades into the 21st century, the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways: the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era; the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes; and most notably, contemporary literacy models and processes enhance and extend earlier theories of reading and writing. Providing a tapestry of models and theories that have informed literacy research and instruction over the years, this volume's strong historical grounding serves as a springboard from which new perspectives are presented. The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution. This edition is a landmark volume in which dynamic, dialogic, and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them. Some additional archival essays from previous editions are available on the book's eResource. New to the Seventh Edition: Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts. New chapters reflect sweeping changes in how readers and writers communicate in a digital era. Slimmer volume is

complemented by some chapters from previous editions available online.

Theoretical and Quantum Chemistry at the Dawn of the 21st Century - Tanmoy Chakraborty 2018-06-19

This volume, edited by a well-known specialist in the field of theoretical chemistry, gathers together a selection of papers on theoretical chemistry within the themes of mathematical, computational, and quantum chemistry. The authors present a rich assembly of some of the most important current research in the field of quantum chemistry in modern times. In Quantum Chemistry at the Dawn of the 21st Century, the editors aim to replicate the tradition of the fruitful Girona Workshops and Seminars, held at the University of Girona, Italy, annually for many years, which offered important scientific gatherings focusing

on quantum chemistry. This volume, like the workshops, showcases a large variety of quantum chemical contributions from different points of view from some of the leading scientists in the field today. This unique volume does not pretend to provide a complete overview of quantum chemistry, but it does provide a broad set of contributions by some of the leading scientists on the field, under the expert editorship of two leaders in the field.

Brick & Mortar Shopping in the 21st Century - Tina Lowrey 2012-10-02

This book explores how traditional retailing operates in the new competitive environment of a combined e-tailing and brick and mortar marketplace. In drawing together the cutting-edge research of a global group of experts in the field of consumer behavior, this volume addresses questions such as: which psychological theories can provide insights into why so many consumers still flock to traditional shopping environments? What situational factors promote or inhibit 'physical' shopping? Which methodologies best capture moderators and mediators of various shopping behaviors? This volume advances the field of consumer psychology by covering the e-tail vs. traditional retail discussion from a 21st Century perspective. Topics include: experiential retail mood and cognition effects during shopping new findings relevant to retail strategy methodological innovations for studying shopping social identity variables that impact shopping third party influences on shopping decisions synergies between brick and mortar retailers and their electronic counterparts. This volume will be of interest to both marketing professionals and graduate students in the areas of advertising, retailing, consumer behavior, marketing communications and psychology.

Nine Practices of 21st Century Leadership - Gary A. DePaul 2022-07-22

Near the end of the 20th Century, the leadership concept radically evolved away from the traditional concept of accomplishing work through others. Unfortunately, too many professionals unconsciously still have faulty traditional assumptions that can get them, their teams, and their organizations in trouble. The author has researched the evolution of leadership and summarizes seven contemporary principles, twenty-six underlying leadership beliefs, and nine crucial practices of 21st Century Leadership. While too many leadership books focus on qualities, DePaul explains specific behaviors for practicing leadership. The second edition includes new research about leadership and leadership development. With the pandemic, organizations have had to rely more on effective leadership to build high-performing teams, often at a distance. Training departments have had to radically update how they develop employees at all levels, and executive coaches have transitioned to virtual client support. With all these environmental changes as well as new social pressures on organizations to embrace diversity, equity, and inclusion, organizations need to change how they lead and avoid allowing their culture to develop by chance.

Ethics and Military Strategy in the 21st Century - George R. Lucas, Jr. 2019-07-30

This book examines the importance of "military ethics" in the formulation and conduct of contemporary military strategy. Clausewitz's original analysis of war relegated ethics to the side-lines in favor of political realism, interpreting the proper use of military power solely to further the political goals of the state, whatever those may be. This book demonstrates how such single-minded focus no longer suffices to secure the interest of states, for whom the nature of warfare has evolved to favor strategies that hold combatants themselves to the highest moral and professional standards in their conduct of hostilities. Waging war has thus been transformed in a manner that moves beyond Clausewitz's original conception, rendering political success wholly dependent upon the cultivation and exercise of discerning moral judgment by strategists and combatants in the field. This book utilizes a number of perspectives and case studies to demonstrate how ethics now plays a central role in strategy in modern armed conflict. This book will be of much interest to students of just war, ethics, military strategy, and international relations.
