Composing to Communicate: A Student's Guide - Robert Saba 2016-01-01

Meeting your students where they are, COMPOSING TO COMMUNICATE: A STUDENT'S GUIDE prepares and engages an increasingly varied first-year composition classroom, in which all students need to achieve the same course outcomes but are not all learning at the same skill level. The fundamental concept behind COMPOSING TO COMMUNICATE: A STUDENT'S GUIDE is that writing is a communication skill grounded in problem solving. The textbook uses accessible language and opportunities for practice to help students conceptualize writing tasks with key communication goals in mind and become more confident, efficient, and effective writers, in college and in their professional lives. Writing project chapters cover evaluations, arguments,

narratives, profiles, literary analyses, and researched writing, and include chapters focused on community engagement and vital 21st century literacy skills. Every Part 2 chapter shows real student work in proposal and final draft, and includes an interview with the student writer. Introductory Chemistry - Mark S. Cracolice 2013

Organic Chemistry - John E. McMurry
2011-01-01

The most trusted and best-selling text for organic chemistry just got better! Updated with the latest developments, expanded with more end-of-chapter problems, reorganized to cover stereochemistry earlier, and enhanced with OWL, the leading online homework and learning system for chemistry, John McMurry's ORGANIC CHEMISTRY continues to set the standard for the course. The Eighth Edition also retains McMurry's hallmark qualities: comprehensive, authoritative, and clear. McMurry has developed a reputation for crafting precise and accessible texts that speak to the needs of instructors and students. More than a million students worldwide from a full range of universities have mastered organic chemistry through his trademark style, while instructors at hundreds of colleges and universities have praised his approach time and time again. Chemistry - Steven S. Zumdahl 2006-01-09

Authors Steven and Susan Zumdahl offer all the elements instructors need for their general chemistry course. They bring a conceptual approach to chemistry and integrate problem-solving skills throughout, helping students transition from theory to practice. A strong emphasis on models, real-world applications, and visual learning prevails throughout the text. The Seventh Edition seamlessly integrates the strengths of the Zumdahl approach through a comprehensive and interwoven print and technology program. Enhanced Sample Exercises, online homework problems, and Classroom Response System content help instructors assess conceptual understanding and problem-solving skills, while new animations and images support visual learning. In addition, Houghton Mifflin offers implementation services

through our TeamUP program to help instructors and students get the most out of the text and its supplements. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Introduction to Organic and Biochemistry -

Frederick A. Bettelheim 2012-01-01

Chemistry: Principles and Reactions -

William L. Masterton 2008-01-24

Discover all of the fundamental topics of general chemistry in the latest edition of this brief, cost-effective, reader- oriented text.

Masterton/Hurley's CHEMISTRY: PRINCIPLES AND REACTIONS, 6e, provides a clear, concise presentation based on the authors' more than 50 years of combined teaching experience. This edition takes you directly to the crux of concepts with simplicity and allows you to efficiently cover all topics found in the typical general chemistry book. New and proven concept-driven examples as well as examples that focus on molecular reasoning and understanding provide important practice. New Chemistry: Beyond the Classroom essays by guest authors demonstrate the relevance of the concepts you are learning and highlight some of the most up-to-date uses of chemistry. A strong, enhanced art program further assists you in visualizing chemical concepts. For the first time, this edition fully integrates OWL (Online Web-based Learning), the homework management system trusted by tens of thousands of students. Integrated end-of-chapter questions and Key Concepts correlate to OWL. An optional e-book of this edition is also available in OWL. To further assist in learning and depth of coverage, the book offers CengageNOW, a Web-based student self- tutorial program. In addition, Go Chemistry™ learning modules developed by award-winning chemists offer mini- lectures and learning tools available for video iPods, MP3 players, and iTunes or CengageNOW to accommodate students like you who are on the go. Chemistry: An Atoms First Approach - Steven S. Zumdahl 2011-01-01

Steve and Susan Zumdahl's texts focus on helping students build critical thinking skills through the process of becoming independent problem-solvers. They help students learn to think like a chemists so they can apply the problem solving process to all aspects of their lives. In CHEMISTRY: AN ATOMS FIRST APPROACH, the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules, structure, and bonding, to more complex

materials and their properties. Because this approach differs from what most students have experienced in high school courses, it encourages them to focus on conceptual learning early in the course, rather than relying on memorization and a plug and chug method of problem solving that even the best students can fall back on when confronted with familiar material. The atoms first organization provides an opportunity for students to use the tools of critical thinkers: to ask questions, to apply rules and models and to evaluate outcomes. Chemistry: Principles and Practice - Daniel L. Reger 2009-01-27

A text that truly embodies its name, CHEMISTRY: PRINCIPLES AND PRACTICE connects the chemistry students learn in the classroom (principles) with real-world uses of chemistry (practice). The authors accomplish this by starting each chapter with an application drawn from a chemical field of interest and revisiting that application throughout the chapter. The Case Studies, Practice of Chemistry essays, and Ethics in Chemistry questions reinforce the connection of chemistry topics to areas such as forensics, organic chemistry, biochemistry, and industry.
